

crude oil by an additional 800,000 barrels per day. This increase in production was to reduce the price of crude oil which has been at near record prices of \$34 dollars per barrel, which OPEC members freely admits is too high. This raise constitutes an increase of 3 percent. Regrettably, this increase is simply not enough to bring down the price of crude oil. OPEC needs to undertake aggressive measures to bring down the price of oil, and an increase in production of 3 percent is not enough—not enough by half!

OPEC is aware of the gravity of the situation, as evidenced by OPEC President and Venezuela's oil minister Ali Rodriguez' statement, "[that] we are approaching a crisis of great proportions because oil production capacity is reaching its limit." In the midst of this crisis, OPEC's increase will not even go into effect until October 1st. OPEC agreed to meet again on November 12th to reassess "market conditions," with full knowledge that its increase was a trivial gesture towards reducing prices of imported crude oil. As reported in The New York Times (9/12/00), heating oil is at record levels, its highest price in a decade—now 51 percent higher than the average for last fall and winter. Some analysts believe that imported crude oil may further spike at \$40 dollars per barrel. Conservatively, it will take a minimum of 6 weeks to ship the increased oil to the United States and another week to 10 days to refine it. Mr. President, we are looking at early December before the oil (and its by-products) will be available to consumers. In real terms, OPEC's increase is too little, too late to alleviate the astronomical and nearly prohibitive cost of home heating oil that confronts the hard working people of our country.

Parts of Europe are in a state of paralysis over this crisis, and in England, Prime Minister Blair authorized the use of the military to quell protesters. In our own country Mr. President, this crisis is grave enough that there are calls to release oil from the Strategic Petroleum Reserve (SPR) which is maintained for use during wartime and national emergencies. This crisis comes at a time when total U.S. reserves are at a 24-year low of 1.53 million barrels from 1.63 a year ago according to the Department of Energy's Energy Information Agency (EIA).

Mr. President, this grave crisis calls for strong measures in dealing with OPEC, and therefore it is imperative that you use the full powers and resources of your office in showing OPEC that its good faith gesture, is not good enough for the people of our country. Mr. President, I will welcome any plans that the Administration is developing to resolve this oil crisis, and I thank you for your urgent attention to this matter.

Sincerely,

BENJAMIN A. GILMAN,
Member of Congress.

TRIBUTE TO SENATOR DANIEL
PATRICK MOYNIHAN

SPEECH OF

HON. NYDIA M. VELAZQUEZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 19, 2000

Ms. VELAZQUEZ. Mr. Speaker, I rise today in tribute to the great senior Senator from New York, DANIEL PATRICK MOYNIHAN. Although words can not do justice to his many contributions over his decades of public service, I wish to offer my thanks for everything he has done on behalf of the people of New York State and the entire nation.

Senator MOYNIHAN gave truth to the cliché of being a gentleman and a scholar. After receiving his bachelor's degree (cum laude) from Tufts University, he studied as a Fulbright Scholar at the London School of Economics. He then returned to the states and completed his studies at Tufts University's Fletcher School of Law and Diplomacy, where he received his M.A. and Ph.D. Before coming to the Senate, he served as a valued member of four consecutive administrations, starting with the Kennedy Administration and serving through the Johnson, Nixon, and Ford Administrations, holding various positions within the Department of Labor. His lifelong dedication to public service was only enhanced by his time in the private sector when he was a Professor of Government at Harvard University in the mid sixties. He served the Nixon and Ford Administrations as U.S. Ambassador to India from 1973 to 1975 and U.S. Representative to the United Nations from 1975 to 1976.

Born and raised in New York City, Senator MOYNIHAN decided to pursue elected office. Upon leaving his position at the United Nations, he was elected U.S. Senator from New York in 1976. His many accomplishments in that office have been well documented. He has served as a strong advocate for welfare reform by promoting the creation of opportunities to increase self-sufficiency, while also maintaining a strong safety net. He has fought to preserve social security and modernize our nation's transportation system, just to name a few.

However, a listing of his legislative accomplishments can not do justice to many of the crucial and intangible qualities he brought to the Congress. Throughout his career, Senator MOYNIHAN's high ideals and great dignity have served as an exemplary model for his colleagues, constituents, neighbors and friends. In a time of increasing partisanship, his wisdom is recognized and sought across party lines. He stands firm for what is right, despite the ever changing political winds. His graciousness and his steadfast reliance on his principals have been an inspiration to all of us who are lucky enough to know him.

New York State, and the entire nation, are better because of his public service. He will be greatly missed, but I hope that he will continue to serve as a voice for the people of the country and a conscience for those of us who represent them.

THE CONSUMER ASSURANCE OF
RADIOLOGIC EXCELLENCE ACT
(CARE)

HON. RICK LAZIO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 25, 2000

Mr. LAZIO. Mr. Speaker, CARE is legislation aimed at patient safety that would ensure technologists administering medical imaging and radiation therapy procedures have sufficient training and expertise. Medical imaging and radiation therapy involve the application of potentially dangerous articles like x-rays, nuclear isotopes, and powerful magnetic fields. Medical imaging provides radiologists and other physicians the vital imagery to diagnose illness and prescribe appropriate treatment. Radiation is the application of radiation to can-

cers as prescribed by oncologists. Currently, over 250,000 individuals work in thirteen disciplines in this field.

CARE would provide incentives for states to license or register persons who perform medical imaging and radiation therapy. Currently 15 states have no regulations governing the education or competence of individuals administering x rays and 29 states have failed to regulate individuals administering nuclear medicine tests. This legislation seeks to redress the deficiencies in the Consumer-Patient Radiation Health and Safety Act of 1981, by encouraging states to put in place minimal standards for the education and certification of practitioners in the field.

CARE is endorsed by the Alliance for Quality Medical Imaging and Radiation Therapy. The Alliance consists of the following organizations: American Association of Physicists in Medicine, American Registry of Radiologic Technologists, American Society of Radiologic Technologists, Association of Educators in Radiologic Sciences, Association of Vascular and Interventional Radiographers, Joint Review Committee on Education in Radiologic Technology, Joint Review Committee on Education in Nuclear Medicine Technology, Nuclear Medicine Technology Certification Board, Section for Magnetic Resonance Technologists of ISMRM, Society of Nuclear Medicine-Technologist Section, and Society for Radiation Oncology Administrators.

CARE is also endorsed by the Following organizations: American College of Radiology, American Organization of Nurse Executives, Cancer Research Foundation of America, National Coalition for Cancer Survivorship, the American Cancer Society, Conference of Radiation Control Program Directors, Inc., Help Disabled War Veterans, Help Hospitalized War Veterans, International Society of Radiographers and Radiologic Technologists, National Coalition for Quality Diagnostic Imaging Services and Philips Medical Systems, Inc.

TRIBUTE TO ALAN EMORY

HON. JOHN M. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 25, 2000

Mr. McHUGH. Mr. Speaker, it is with great pleasure that I rise today to pay tribute to Alan Emory, a veteran writer for the Watertown Daily Times who is battling pancreatic cancer.

June 7 marked Alan's 51st year with the Times, 47 years of which he spent covering the Capital, earning him the title of Times Senior Washington correspondent. As a reporter, Alan has always held himself up to the highest standards of journalistic integrity. His readers have come to expect objective, accurate and intelligent reporting of events, both big and small.

Alan's readers have also come to expect from him a thoughtful understanding of the issues and events that affect our everyday lives. Through his weekly Sunday column, Alan has touched the lives of many by relating his own experiences, which enlighten and inspire, motivate and comfort. One such experience is his battle with cancer. In his weekly column, he recounts this very personal ordeal with his usual candor, and never before have his sense of humor, his courage, and his humanity been more clearly demonstrated to all
